

AUTO FEED SCREW DRIVERS AND COLLATED FASTENERS

Shield — Guard *Premium Deck Screws*

Muro North America Inc. is the industry's leader in the manufacture of Auto Feed Screw Drivers and Collated Fasteners.

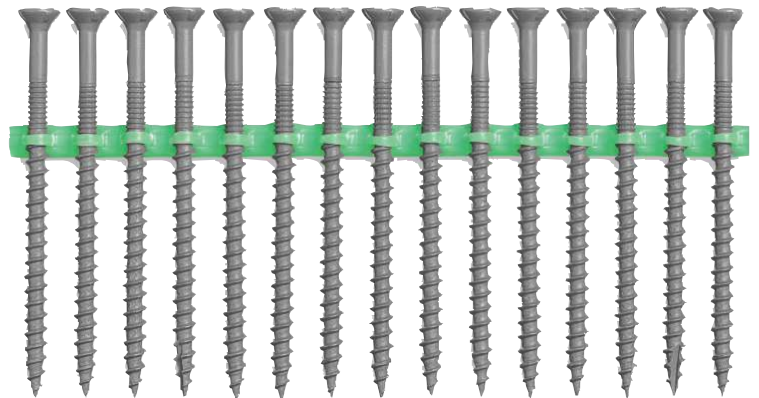

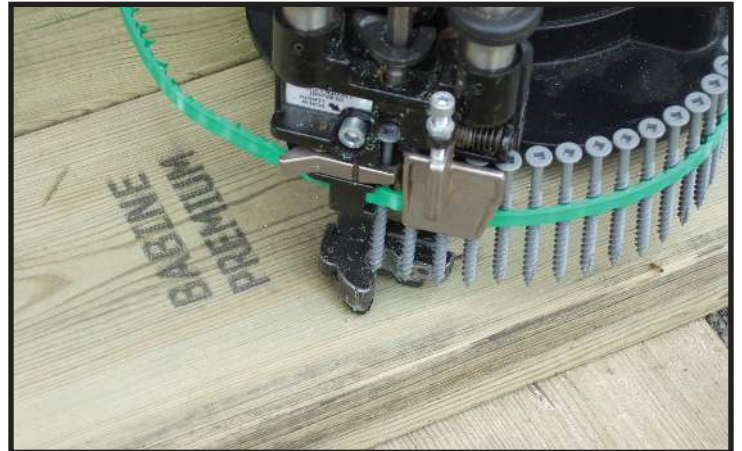

In recent years deck building has incorporated new materials and technologies to make the process of building decks, docks and boardwalks more efficient and environmentally responsible. Tools that are more powerful and accurate than ever before and with deck coverings and screws that ensure the highest quality finish and aesthetically pleasing results.

Shield Guard color coated screws are one of the ways to ensure that your project has that professional and seamless finish for years to come.

SHIELDGUARD™ provides superior corrosion resistance without using heavy metals in both the coating film and the pretreatment process.

1500 hours min. ASTM B117 salt spray
30 cycles in Kesternich*

* The Kesternich Test in accordance with ISO 3231 (or ASTM G 87) is a condensation cycle test in an acidic environment. In the closed container, in which the test samples are exposed, during the first 8 hours an atmosphere of 100% relative humidity at a temperature of 40 maintained.
